

Oregon Optometry & CONTACT LENSES

In our continued efforts to bring the most advanced technology to our patients, we are proud to announce the inclusion of the Optomap Retinal Exam as an integral part of your exam today.

Our doctors are concerned about retinal problems including macular degeneration, glaucoma, retina holes or detachments, and systemic diseases such as diabetes, stroke, and high blood pressure. These conditions can lead to serious health problems, including partial loss of vision or blindness, and often develop without warning and progress with no symptoms.

An Optomap Retinal Exam provides:

- An eye wellness scan.
- An in-depth view of the retinal layers (where diseases can start).
- The ability for you to view your Optomap image at the time of your exam.
- An annual, permanent record of your ocular health, which gives your doctor valuable comparison for tracking and diagnosing potential eye diseases.

Insurance may or may not cover this advanced screening. However, our doctors recommend the Optomap Retinal Exam every year for all patients. I understand that if this important image is not covered by my insurance, I agree to pay \$39 for this enhancement to the general eye exam.
